

KEIPER Limited – London, ON, Canada

The London plant is situated in the Canadian province of Ontario, half way between Detroit and Toronto. Built in 2000 it has now scaled up to a size of approximately 161,500 sq ft (15000 square meters). The plant currently employs about 450 people and manufactures about 2 million seat structures per year. They are delivered to various first-tier suppliers in North America.
